-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Drawings

1. The drawing was received on 8/03/04. This drawing is FIG. 2 in which a reference number 53 is added.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 2-5 and 12, drawn to a correcting device which correct printing color, based on printing color correcting information of printing paper characteristics and **the measured temperature** which are sent from a network server.
 - II. Claims 6-9 and 13, drawn to a correcting device which correct printing color, based on printing color correcting information of printing paper characteristics which is sent from a network server, and **the measured humidity** (note: the printing color correcting information is not required to be changed based on the measure humidity information).
 - III. Claims 10-11, 14-22, drawn to a correcting device which correct printing color, based on **only** printing color correcting information of printing paper characteristics being sent from a network server.
3. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. Group I requests a correcting device which correct printing color, based on printing color correcting information of printing paper characteristics and **the measured**

temperature which are sent from a network server; group II requests a correcting device which correct printing color, based on printing color correcting information of printing paper characteristics which is sent from a network server, and **the measured humidity** (note: the printing color correcting information is not required to be changed based on the measure humidity information); group III requests a correcting device which correct printing color, based on **only** printing color correcting information of printing paper characteristics being sent from a network server. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

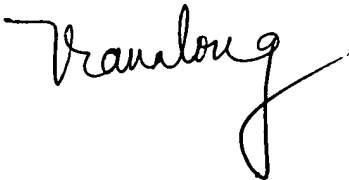

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
